Garden Design Center

Design Services & Garden Maintenance

On-site consultation

This is an organizational and educational experience for the client. Possibilities of work to be done during the consultation include site analysis, location of garden areas, specific plant suggestions, plant identification, and problem solving. The designer may leave the client with rough sketches, plant lists, and conceptual diagrams of issues discussed during the meeting. At this point you may decide you would like a design proposal, garden plans and/or estimates for garden work. *\$85 with design staff—\$125 with Nancy DuBrule Clemente per hour plus tax*

In-house consultation

This consultation takes place at Natureworks. The client will provide the designer with garden examples found in books, magazines or on the web, as well as photographs and measurements of an area or areas to be designed. We will offer plant lists, rough sketches or scale drawings, and creative feedback for the landscaping project. *\$85 with design staff—\$125 with Nancy DuBrule Clemente per hour plus tax*

Design Proposal & Garden Plans

The proposal outlines the areas to be designed and provides a cost to design and prepare the garden plans. It does not include the cost to implement the project. The plans are hand drawn and provide the garden layout with emphasis on placement of individual and groups of plants. A list of plants on the plan is also provided. *\$85 with design staff—\$125 with Nancy DuBrule Clemente per hour plus tax*

Labor

Our skilled crew members will professionally install gardens designed by Natureworks. We also offer several maintenance options to keep your new and existing gardens beautiful throughout the seasons. *\$58 per hour per crew member plus tax & travel. Additional charges may occur including delivery and hauling away of materials, and equipment rental fees.*

Estimates

We can provide estimates for plants, materials and labor costs for our crew to clean-up, remove, renovate, install and/or maintain your gardens.
